

LOS ANGELES COUNTY REGIONAL PARK AND OPEN SPACE DISTRICT

May 23, 2013

TO: Each Supervisor 

FROM: Russ Guiney
Director, Parks and Recreation

SUBJECT: **LOS ANGELES COUNTY REGIONAL PARK AND OPEN SPACE
DISTRICT PROPOSITION A PHASE OUT
BOARD MOTION OF JANUARY 22, 2013, ITEM NO. 4**

BACKGROUND

On January 22, 2013, your Board adopted a motion instructing the Director of Parks and Recreation, in his capacity as the Director of Los Angeles County Regional Park and Open Space District, in consultation with the Chief Executive Officer, County Counsel, and financial advisors and consultants as necessary, to prepare the following: a report summarizing the projects completed with Proposition A funding to date; an assessment of the need for capital outlay to buy and build park and open space projects during the next 10 and 20 years in Los Angeles County, a legal analysis of potential mechanism to raise the funds for the identified capital outlay; and a report in response to the issues relating to the impending phase out of Propositions A of 1992 and 1996.

Accordingly, the Los Angeles County Regional Park and Open Space District ("District") has prepared this response in anticipation of the sunset of the assessments associated with the 1992 and 1996 Propositions. In 1992, the voters of Los Angeles County, pursuant to Proposition A, approved the creation of the District for the purpose of preserving open space within the County of Los Angeles. In 1996, the voters once again approved a similar measure, known as the 1996 Proposition A, to augment the funding for open space within Los Angeles County. California Public Resources Code Section 5500 et seq. designated your Board as the Board of Directors of the District and authorized the County to provide any staff or services necessary to administer the District.

The legal analysis of potential funding mechanism shall be forwarded to you under separate cover by County Counsel.

Attachment A provides a summary which includes: Projects Completed by Proposition A; Impending Phase out of the Benefit Assessments, How Funds Are Treated, and the Need for Capital Outlay in the next 10 to 20 years.

The 1992 Proposition A accomplished the following:

- Formed the Los Angeles County Regional Park and Open Space District.
- Formed a Landscape and Lighting Act benefit assessment district.
- Adopted and levied the assessment as set forth in the Engineers Report previously adopted by your Board (\$9.39 per Benefit Point).
- Authorized \$540 million to purchase, develop, improve and restore park, wildlife, coastal and natural lands, and recreation facilities throughout Los Angeles County.
- Adopted a list of 100 specific projects as well as funds for the most pressing park, recreation, beach, inner city, and natural areas in Los Angeles County.
- Adopted criteria, timelines, limitations, and various guidelines for the use of all funds generated by the assessment and for the administration of the District.

The 1996 Proposition A accomplished the following:

- Levied an additional assessment of \$5.07 per Benefit Point within the District.
- Amended the method of assessment, allowing for lands greater than 2.5 acres with some development not to be assessed.
- Authorized \$319 million for the acquisition, development, improvement, restoration or rehabilitation of real property for recreational facilities, parks and park safety, gang prevention, senior citizen recreation facilities, wildlife habitat, natural lands, improvement of Santa Monica Bay, multi-use sports facilities, lakes, fishing and boating facilities, trails, rivers and streams, significant ecological areas, equestrian facilities, and museums and cultural facilities.
- Adopted an additional list of 154 specific projects.

PROJECTS COMPLETED BY PROPOSITION A TO DATE

Over the last 20 years, the District, the County, and the cities have been working on the 100 specified projects and other projects identified in the propositions:

Total Number of Projects Awarded: 1,403

Number of Projects Completed: 1,155

Number of Projects Open & In Progress: 248

Total Amount of Funds Committed (1992, 1996 Propositions & Excess Funds):
\$984,330,045

Total Amount of Funds Paid (1992, 1996 Propositions & Excess Funds):
\$887,527,038

The amount of funds committed is the amount awarded to a project by your Board. The differences in the two figures above (\$96,803,007) are the funds awarded to active, ongoing projects not yet paid out (See Attachment B, All Proposition A Grants for a complete list of Proposition A projects).

IMPENDING PHASE OUT OF THE BENEFIT ASSESSMENT IN 1992 AND 1996 PROPOSITION A: CHANGES IN HOW FUNDS ARE TREATED

Distribution of Revenues

In the first 20 years of each assessment, the revenues were directed to be expended with a minimum of 80 percent of all proceeds on capital outlay projects and debt service. (See Section 23 of the 1992 Proposition A & 1996 Proposition A in End Notes.) Fiscal Year 2012-13 is the 20th year of the 1992 Proposition. The current conditions are that 80 percent of revenue goes to capital outlay, 15 percent to the Maintenance and Servicing Fund (M&S), and 5 percent to the Administrative Fund. In the 21st year, this restriction ends, and actual administrative costs will be reimbursed. (See Section 23 (a) of the 1992 Proposition A in End Notes.) At that point, the distribution of revenues will be as follows:

- (1) 15 percent to the M&S Fund;
- (2) Reimbursement of actual administrative costs; and
- (3) The balance to capital projects, including payment of debt service.

This distribution plan was reflected in the projections found in the 2012 Plan of Revenue and Expenditures approved by your Board. It is anticipated that the District will bring the 2013 Plan before your Board for action in June 2013.

In the initial years of the District, the 5 percent of revenues set aside for the administration of the District exceeded the administrative costs. These funds are held in the Administrative Fund, whose balance in FY 2012-13 was \$16,381,000. Currently, the costs to administer the District exceed the 5 percent of revenues due to increased District staff necessary to administer a larger amount of projects.

Fiscal Year	District Administrative Costs Compared to Revenue
FY 2011-12	6.25%
FY 2012-13	6.5%
FY 2013-14	Estimated 6.25%

In the future, the District will continue to ensure that a balance is kept in the Administrative Fund. The Administrative Fund is also utilized to pay for extraordinary expenses like those associated with litigation, financial planning as well as services provided by other County departments.

Excess Funds

Section 24 of the 1996 Proposition defines the calculations of Excess Funds. Excess Funds come from the benefit assessment income and interest from investments. When this amount is calculated annually, 80 percent of the total amount is declared as excess ("Excess Funds") in the Plan of Revenue and Expenditures. The remaining 20 percent of the total amount remains in the regular project fund gathering interest and is rolled forward for calculation of future excess.

Beginning in FY 2013-14, of the remaining 20 percent in the regular project fund, 50 percent to 100 percent of that amount will be applied toward the Administrative Fund. These figures were derived from projections calculated so as to ensure the continuity of the District administration through at least 2029, with oversight and monitoring of all projects. The Administrative Fund would also anticipate and cover any extraordinary costs like those for litigation, financial consultants and services provided by other County departments.

After sunset of the 1992 assessment in FY 2014-15, 65 percent of assessment revenues supporting the District will cease. Collections for delinquencies will continue as will investment revenue, and assessments levied by the 1996 Proposition. After sunset of the 1996 assessment in FY 2018-19, the last assessment revenue stream will also stop. The 2013 Plan projections show that there will Excess Funds to manage from FY 2018-19 forward, and will require that the administration of the District continue beyond the sunset of the assessment periods.

Application of funds in the above manner is supported by language in both propositions where the restrictions for assessing administrative costs do not apply to funds derived from M&S Funds and Excess Funds (see Section 23 (a) of the 1992 Proposition A).

The District will also prepare a plan for decreasing the number of staff as the number of active projects diminishes, enabling the oversight tasks by the District to be carried farther into time. The current financial projections show the District declaring Excess Funds until FY 2018-19.

Maintenance and Servicing Funds: Regular and Excess

Both propositions require M&S to be funded for a 20 year period. The District will fund M&S at 15 percent of the assessments for 22 years of each assessment period. Commencing with FY 2013-14, the District will apply the interest from unspent M&S Funds to the Project Fund as opposed to each recipient's account.

With the lifting of the restrictions in Section 23 (a) of both propositions, calculation of M&S funds for projects funded with Excess Funds will begin FY 2013-14. The District will deposit these funds into separate accounts and allow grantees with closed and completed Excess Funds projects to request payment for M&S purposes. Changes to the Procedural Guide are still in the development stage for this item and upon completion, shall be presented to your Board for consideration.

Completion & Closing of Projects

The District has developed a Strategic Plan to expend all unspent funds (see Attachment C, A Strategic Plan to Expend 1992 Proposition A Funds). This Strategic Plan will continue to be updated and improved to enable implementation and provide procedures to proactively facilitate the closing of grants and disbursement of unspent funds. At a later date, the District will develop a strategic plan to expend the funds from both the 1996 Proposition A Funds and Excess funds.

The District is also looking at the number and functions of staff as it starts to deplete the number of active projects and will continue to analyze the costs to manage each project to better estimate the appropriate amount of staff needed as the volume of the work of administering the District diminishes over the next 10 to 20 years.

When funds are awarded, a project agreement is executed which includes a performance period for the specific project. Typically, projects funded by the District take 4 to 10 years from beginning to completion. The District is working with its grantees to assess project progress, assist the project forward or end the project in a timely fashion.

The following are steps being taken by the District to close all uncompleted projects:

1. New guidelines for extending completion dates of the projects are being developed and the Procedural Guide will be revised. Amendments to extend project agreements will be revised to require proof that the project has actually progressed and that an updated timeline to complete the project has been provided.
2. All grantees with uncompleted projects have been advised in writing by the District of the impending sunset of the assessments and the need to have all projects completed and closed as expediently as possible.
3. Grantees are now required to submit Quarterly Project Status Reports to show the percentage of completion for each project.
4. If the progress toward completion is too slow, the District will meet with such grantees to assist with impediments to completion, if possible. If these actions do not result in a completed project by a negotiated date, the final recourse would be to recommend to your Board the termination of a project agreement.
5. Any remaining 1992 and 1996 Proposition funds unallocated, uncommitted to grants, or unspent will be brought before your Board for action within five years after the respective sunset dates.
6. Any remaining Excess Funds will continue to be available for allocation at the discretion of your Board.
7. The M&S Fund will continue until funds are depleted by the recipients to maintain the projects funded by the 1992 and 1996 Propositions. M&S for projects funded with Excess Funds will begin to accrue in 2013-14 and made available to grantees in 2014-15.

Expending Allocated, Unspent Funds

In those cases where funds are allocated generally with no specific project in mind, the District will continue to work with the grantee and appropriate Board office in assessing the options for those funds and the potential projects. The District has expended all bond funds on capital outlay projects and is currently expending assessment funds and Excess Funds. The District will attempt to ensure that these funds are expended while staff is at its most robust, or before 2025.

NEED FOR CAPITAL OUTLAY FOR PARK AND OPEN SPACE PROJECTS IN THE NEXT 10 TO 20 YEARS IN LOS ANGELES COUNTY

Large areas of the County are underserved by park and recreational facilities. Nearly two out of three children in the County do not live within walking distance (one quarter mile) of a park, playground, or open space. The Department of Parks and Recreation

(DPR) conducted a preliminary gap analysis to determine the County's need for additional parks and to identify park poor areas. The Gap Analysis Study shows that the County faces significant deficits in local and regional parkland: 3,578 acres for local parkland and 32,096 acres for regional parkland. Based on population projections, these deficits will increase to 5,945 acres in local parkland and 47,216 acres in regional parkland by the year 2035, if no new parks are created. (See Attachment D, Chapter 7: Parks and Recreation Element from the Draft Los Angeles County General Plan for a more detailed discussion.)

The District asked both DPR and the Department of Beaches and Harbors (DBH) what unmet needs they have identified to date for capital outlay projects. Based on this preliminary information, the current unmet need for these departments is estimated to be \$920 million. The allocation of DBH and DPR in the last two propositions averaged 26.62 percent. Extrapolating these figures, the unmet need for capital outlay for park and open space projects during the next 10 to 20 years in Los Angeles County is estimated at over \$6.7 billion.

The District has been very successful in changing the fabric of many of the communities within its boundaries by improving and increasing the parks, open space and recreational amenities over the last 20 years with the funds generated by the two propositions. These gross numbers for unmet need give direction to the District to complete a Needs Assessment for local and regional parks, open space and recreational opportunities. The results of this type of study (whose cost is estimated to be \$3 million) will give a more complete understanding of the where current gaps remain in the County for the most pressing park, recreation, beach, inner city and natural areas. Identifying these gaps will help to direct where some of the Excess Funds should be spent in accordance with the language of the Propositions.

END NOTES:

Relevant Section of the 1992 AND 1996 Propositions

Section 23 (a) of both Propositions state: In each of the first 20 (twenty) years after the date the Additional Assessment is first levied and collected, a minimum of eighty percent (80%) of all proceeds of the Additional Assessment levied and collected by the District shall be used for capital outlay projects, including, but not limited to, acquisition and improvement of real property. For purposes of this resolution, capital outlay projects include the servicing of bonds, notes or other evidences of indebtedness issued by the District.

Relevant Sections of the 1996 Proposition

Section 10 No funds authorized under Section 3 may be disbursed to any recipient unless the recipient agrees:

- (a) To maintain and operate in perpetuity the property acquired, developed, improved, rehabilitated or restored with the funds. With the approval of the granting agency, the recipient or its successors in interest in the property may transfer the responsibility to maintain and operate the property in accordance with this Section.

Section 21 (b) provides: Consistent with subsection (a) of Section 23, proceeds of the Additional Assessment shall be used for: (i) costs of maintenance and servicing of projects funded by the District (whether such projects were funded through the application of cash proceeds of assessments or proceeds of bonds, notes or other evidences of indebtedness issued by the District in accordance with this resolution or the 1992 Order) or otherwise acquired pursuant to this resolution, (ii) payment of actual administrative costs associated with carrying out the purposes of the District, by the District and recipient Public Agencies, and (iii) either to pay directly the costs of projects authorized pursuant to this resolution or the 1992 Order, or to pay debt service on any bonds, notes or other evidences of indebtedness of the District.

Section 21 (d) states: All proceeds of the Additional Assessment shall be deposited into the Parks Fund established pursuant to the 1992 Order. The Auditor-Controller of the County, on behalf of the District, may create any other funds, accounts or subaccounts necessary or desirable to account for the funds of the District, including the proceeds of assessments and bonds, notes and other evidences of indebtedness issued by the District.

Section 21 (e) states: In accordance with the 1992 Order, all revenue generated by the District, including the proceeds from the issuance of any bonds, notes or other evidences of indebtedness, shall be deposited in the Parks Fund and shall be allocated among all affected Public Agencies within the District as defined in Section 5506.9 of the California Public Resources Code, for expenditure consistent with the purposes of Division 5, Chapter 3, Article 3 of said Public Resources Code and of the 1992 Order and this resolution. The County shall be reimbursed from the Parks Fund for the actual costs of administration of the District and the costs of issuance of bonds, notes or other evidences of indebtedness by the District. (5506.9 Division 5 Chapter 3, Article 3 of the Californian Public Resources Code is the governing legislation creating the Regional Park and Open Space District).

Section 21 (h) states: The amounts of all allocations designated in Section 3 are net amounts, and shall not be reduced for administrative costs of the District.

Section 23 (b) states: On an annual basis, fifteen percent (15%) of all proceeds of the Additional Assessment and the 1992 Assessment (or such greater percentage of the proceeds of the Additional Assessment and the 1992 Assessment, not to exceed twenty percent (20%), as determined by the Board) shall be set aside and designated as the maintenance and servicing amount, and shall be used only to maintain and service capital outlay projects funded by the District pursuant to the 1992 Order and this resolution. Such maintenance and servicing amount of the Additional Assessment and the 1992 Assessment shall be allocated each year as follows: (1) to the County (for the benefit of the Department of Parks and Recreation, or the Department of Beaches and Harbors, or any other applicable department as determined by the Board), an amount obtained by multiplying the aggregate amount of such maintenance and servicing funds to be allocated for such year by a fraction, the numerator of which is the number of parcels of land in the unincorporated area of the County and the denominator of which is the total number of parcels of land in the County; (2) to the Santa Monica Mountains Conservancy, or any other agency designated by it to manage properties acquired pursuant to this resolution or the 1992 Order by the Conservancy or any joint powers entity to which the Conservancy is a party which has acquired properties pursuant to the 1992 Order or this resolution, a percent of the total maintenance and servicing funds that equals the percent of the total capital outlay funds that are allocated to and/or to be expended by the Santa Monica Mountains Conservancy and Mountains Recreation and Conservation Authority pursuant to Section 3 of this resolution; and (3) except as provided in the next paragraph, to each incorporated city within the District, an amount obtained by multiplying the maintenance and servicing funds remaining after the allocations described in the preceding clauses (1) and (2) by a fraction, the numerator of which is the number of parcels of land in such city and the denominator of which is the total number of parcels of land in the incorporated areas of the County. Of the maintenance and servicing funds allocated to the County in this resolution and the 1992 Order, the Department of Beaches and Harbors shall be allocated an amount obtained by dividing the total amount of funds allocated to the Department of Beaches and Harbors in this resolution and the 1992 Order by the total amount of funds allocated for specific identified projects and for per parcel grants to the Department of Parks and Recreation in this resolution and the 1992 Order. On an annual basis, one million seven hundred thousand dollars (\$1,700,000) shall be deducted from the maintenance and servicing funds allocated to the City of Los Angeles in this resolution and the 1992 Order, and such amount shall be used to pay debt service on bonds, notes or other evidences of indebtedness issued to fund the project described in Section 8(b)2.V.x of the 1992 Order. In the event of an inconsistency between this Section and Section 23 of the 1992 Order, this Section shall prevail.

Section 24 (a) states: To the extent permitted by applicable law and not inconsistent with the other provisions of this resolution, in each fiscal year, as determined by the independent audit conducted pursuant to subsection (i) of Section 21, a portion of the excess of (1) assessment revenues collected pursuant to this resolution and the 1992 Order plus investment earnings thereon, and any other revenues of the District (excluding bond proceeds or any other evidences of indebtedness, but including collections of delinquent assessments and interest and penalties thereon), all cumulative to the date of the independent audit, over (2) amounts expended for capital outlay (excluding capital outlay funded with bond proceeds or other borrowed funds), and amounts expended or allocated for maintenance and servicing, administrative costs and debt service, all cumulative to the date of the independent audit (such excess being hereinafter referred to as the "Excess"), shall be allocated by the Board for grants in furtherance of the purposes of this resolution and the 1992 Order. The independent Financial Consultant referred to in subsection (j) of Section 21 shall annually determine what portion of the Excess from the prior year may be made available in the next fiscal year pursuant to this Section 24 without impairing the ability of the District to finance all capital outlay projects specified in Section 3 of this resolution and in Section 8 of the 1992 Order by the end of fiscal year 2008-09 and without impairing the District's ability to issue or repay bonds, notes or other evidences of indebtedness (such amount being hereinafter referred to as the "Available Excess"). The independent Financial Consultant shall make a recommendation as to the Available Excess to the District for its use in preparing the annual Plan of Revenues and Expenditures referred to in subsection (j) of Section 21. In each year, 80 percent of the Available Excess as identified in the Plan of Revenue and Expenditures approved by the Board shall be allocated by the Board pursuant to this section and in accordance with the following schedule (to the extent permitted by applicable law and not inconsistent with the other provisions of this resolution): 80 percent shall be allocated for capital projects and 20 percent shall be allocated for maintenance and servicing of those capital projects.

If you have any questions regarding this matter please me or your staff may contact Jane I. Beesley at (213) 738-2981.

County Counsel
Chief Exeuctive Office (William T Fujioka, Rita Robinson)

Summary Sheet: Regional Park and Open Space District Response to January 22, 2013 BOS Motion

- This year, FY 2012-13, is the 20th year for the 1992 Proposition A, there are restrictions that end in the 20th year. The 20th year for the 1992 Proposition A will be FY 2016-17.
- Statistics of both Propositions to date:
 - Number of Projects complete: 1155
 - Number of Projects in progress: 248
 - Total amount of funds committed (Inclusive of '92, '96 & Excess funds): \$984,330,045
 - Total amount of funds paid (Inclusive of '92, '96 & Excess funds): \$887,527,038
- In the 21st year of the 1992 Proposition A, FY 2013-14, administrative expenses will be shown as reimbursed for actual costs, a change from the 5% used in the first 20 years. The restriction for capital projects will be lifted and therefore the distribution of revenues will be as follows:
 - 15% to maintenance and servicing fund
 - Reimbursement of actual administrative costs
 - Balance to capital projects including payment of debt service
- In the 21st year of the 1996 Proposition A, FY 2018-19, administrative expenses will be shown as reimbursed for actual costs, a change from the 5% used in the first 20 years. The restriction for capital projects will be lifted and therefore the distribution of revenues will be as follows:
 - 15% to maintenance and servicing fund
 - Reimbursement of actual administrative costs
 - Balance to capital projects including payment of debt service
- Excess Funds are those funds derived from the excess of all revenues over expenses. Then 80% of this amount is declared as Excess Funds to be allocated annually. The remaining 20% has rolled forward for calculation of future excess. Starting in FY 2013-14 50% of these funds up to all of this remaining 20% will be moved to the Administration Fund annually. To fund the administration of the projects funded with Excess Funds.
- The percentage of Administrative Costs to revenue was at 6.5% in FY 2011/12.
- The projection for the final year of Excess Funds being declared is 2018-19.
- Regular M&S Funds will be funded for the full 22 years of the assessment periods.
- Excess M&S Funds will begin for Excess Funded projects starting in FY 2013-14, available to the recipients in FY 2014-15.
- The District Staff has instituted more proactive grant management policies like: Noticing grantees that the '92 assessment period is ending, requiring regular

Attachment A

progress reports, reviewing and analyzing a project's progress and assisting the grantee to completion or closure of grant.

- District staff has begun a dialogue with recipients of unallocated and unspent specified funds with the goal of allocating and expending them within 5 years after the end of the assessment.
- The projected need for capital outlay to buy and build park and open space projects during the next 10 and 20 years in Los Angeles County is over \$6.7 billion.

A Strategic Plan to Expend 1992 Proposition A Funds

Introduction

The 1992 Safe Neighborhood Parks Proposition (1992 Proposition A), was approved by the voters on November 3, 1992. The 22-year assessment will end in Fiscal Year 2014-2015. The proposition allocated \$540 million in project funds, of which \$521 million have been paid out to 164 grantees. Nearly all of the remaining \$19 million is committed to ongoing projects but small pockets of funds, including competitive funds in seven project categories remain as residual balances not currently allocated to projects.

The Strategic Plan will address two objectives pertaining to the goal of expending 1992 Proposition A Funds by the target date of June 30, 2015: 1) Implement a methodology to assist grantees in closing out grant projects by the target date; and 2) Position the residual competitive grant funds for expenditure by the target date.

The Strategic Plan is an intra-sectional assignment, with the Administration Section as lead. The following persons deserve recognition for their contribution to this important work: Ms. Josie Ang and Mr. Trinh Bui of the Budget/Fiscal/Audit Section, Ms. Phyllis Cunningham and Mr. Agie Jordan III of the Program Management Section, and Ms. LaTrina Hancock, Ms. Martha Lopez and Mr. Tim Lamson of the Administration Section.

Methods to Assist Grantees in Closing-Out Grant Projects

1. **Grant Balances Report.** Prepare a report of all grants with 1992 Proposition A balances. This shall be performed initially by the Budget/Fiscal/Audit Section. Following that, the Administration Section shall expand and maintain the report. The report shall include:
 - a. Supervisorial District
 - b. Program Manager
 - c. Funding Category
 - d. Proposition Section
 - e. Category Description
 - f. Grantee
 - g. Project Description
 - h. Grant Number
 - i. Amount Committed to Grant with Totals
 - j. Grant Balance with Totals
 - k. Execution or Amendment Date of 1992 Proposition A Funds
 - l. Project Performance End Date
 - m. Project Status and Next Step

2. **Grant Balances Report Update.** Update the report on the first day of each month and distribute to all Section Heads electronically. This shall be performed by the Administration Section.
3. **Letter to Grantees.** Prepare a letter to grantees that strongly encourages grantees to expend all 1992 Proposition A funds. This shall be performed by the Program Management Section. In drafting the letter, the following factors may be considered:
 - a. Contractual obligations, the years the grant has been open, and possibly factors pertaining to voter approval of a new bond.
 - b. Statement of consequences for non-compliance (stated in broad terms).
 - c. Each letter will also include:
 - i. Grant number
 - ii. Funding category
 - iii. Proposition section
 - iv. Project title
 - v. Grant balance with totals
 - vi. Date 1992 Proposition A funds were contracted or amended in grant
 - vii. Current performance period end date
 - d. Vet the letter with management, County Counsel, and Board Offices as needed.
4. **Timeline.** Prepare a schedule for the distribution of the letters to grantees. This shall be performed by the Project Management Section. Timeline shall consider the following factors:
 - a. Initial mailing to all grantees with 1992 Proposition A balances.
 - b. Determine schedule for follow-up mailings, triggered by performance end date.
5. **Project Progress Report.** The letter to grantees shall include a form that the grantee shall complete which documents the progress of the project including but not limited to: completed work, potential obstacles hindering completion, percentage of project completed, and estimated date of project completion.
6. **Determining Next Course of Action with Grantee.** The Program Manager shall review the Project Progress Report with the Program Management Section Head to determine the best course of action to take with the grantee. If the Program Manager believes that minimal progress is being made toward the goal of grant closing, then the Program Manager and Section Head will discuss the matter with and request the District Administrator to deal with the matter on a high administrative level, e.g. City Manager.

Position Residual Competitive Grant Funds for Expenditure

1. **Competitive Balances Report.** Prepare a report of all 1992 Proposition A true competitive grants with balances. True competitive grants are those that were authorized by the 1992 Proposition A in the following seven competitive categories: Trails Acquisition and Development (Section 8.a.3.A), Senior Centers and Recreation Facilities (Section 8.a.3.B), Urban Tree Planting (Section 8.a.3.C), Rivers and Streams (Section 8.a.3.D), Graffiti Prevention (Section 8.a.3.E), and At-Risk Youth Recreation and Service Facilities (Section 8.a.4). Distribute to all Section Heads electronically. This shall be performed by the District's Special Assistant/Program Manager. The report shall include:
 - a. Supervisorial District
 - b. Program Manager
 - c. Funding Category
 - d. Proposition Section
 - e. Category Description
 - f. Grantee
 - g. Project Description
 - h. Grant Number
 - i. Amount Committed to Grant with Totals
 - j. Grant Balance with Totals
 - k. Project Status and Next Step
2. **Competitive Balances Report Update.** Update the report on the first day of each month and distribute to all Section Heads electronically. This shall be performed by the Program Management Section.
3. **Cessation of the Project Performance Period.** In January 2011, at the direction of the District Administrator, the Program Management Section contacted all grantees of true competitive grants and informed them that no extensions of the project performance period will be approved beyond December 31, 2011. This means that all costs to be charged against a competitive grant must be incurred on or before December 31, 2011 and is an important pro-active step in encouraging grantees to complete their projects.
4. **Letters to Grantees.** Prepare a letter to grantees that strongly encourages grantees to expend all 1992 Proposition A true competitive funds. This shall be performed by the Program Management Section. In drafting the letter, the following factors may be considered:
 - a. Contractual obligations, the years the grant has been open, and possibly factors pertaining to voter approval of a new bond.
 - b. Statement of consequences for non-compliance stated in broad terms.

- c. Each letter will also include:
 - i. Grant number
 - ii. Funding category
 - iii. Proposition section
 - iv. Project title
 - v. Grant balance with totals
 - vi. Date 1992 Proposition A funds were contracted or amended in grant
 - vii. Current performance period end date
 - d. The letter shall be vetted District and Department management, County Counsel, and Board Offices as needed.
5. **Timeline.** Prepare a schedule for the distribution of the letters to grantees. This shall be performed by the Project Management Section. Timeline shall include the initial mailing date and follow-up mailings, if needed.
6. **Project Progress Report.** The letter to grantees shall include a form the grantee shall complete which documents the progress of the project including but not limited to: completed work, potential obstacles hindering completion, percentage of project completed, and estimated date of project completion.
7. **Determining Next Course of Action with Grantee.** The Program Manager shall review the Project Progress Report with the grantee, analyze and prepare a recommendation with justification, and submit it to the District's Project Review Committee. The Project Review Committee will review the materials submitted by the Program Manager and recommend to the District Administrator the action that should be taken regarding the future of the true competitive grant. Each grant will be studied on a case-by-case basis. The guidelines for consideration include:
- a. If there has been zero construction activity to date, the grant may be terminated.
 - b. If construction has begun and the grantee has been partially reimbursed but has not completed the project, the grantee may be required to return the reimbursed portion to the District and the grant may be terminated.
 - c. If the project has been completed and there are residual funds remaining, the District will close the grant upon receipt of all closing documents. Residual funds will revert back to the District.
8. **Special Circumstances.** Prepare a memo to County Counsel regarding any grants that the District shall propose to "administratively close" because of unique circumstances.

9. **Recommendation for Use of Competitive Grant Balances.** The District Committee for the preparation of this Strategic Plan discussed, in length, the best use for true competitive grant balances. The Committee recommended that these funds be used for projects that fill a high-priority need among the majority of eligible grantees. It was determined that projects such as graffiti prevention and/or tree planning would best fit these criteria. Further, the Committee recommended that these funds be awarded to the applicants with the highest scores, regardless of Supervisorial District.

Board Office Notification

The Strategic Plan shall identify the scope of issues, if any, of which to apprise the offices of the Board of Supervisors.

Analysis of the Data

The Strategic Plan shall include an analysis of the 1992 Proposition A grant balances. The purpose of the analysis is to graphically show the magnitude of the issue and to aid in the development of solutions. The grants shall be analyzed to determine: a) the amount of dollars outstanding and b) the number of years the grants have been classified as open grants. For the purposes of this analysis, the residual 1992 Proposition A funds are found in three main categories: competitive grants, non-competitive grants, and placeholder grants. As of January 31, 2012, the combined total of the sixty-seven Prop A grants with unspent balances amounted to \$19,197,230.

1. All 1992 Proposition A Grants

-Years Open. Thirty-seven percent or seventeen grants with 1992 Proposition A balances have been in place for sixteen to eighteen years. Twenty-eight percent or thirteen grants have been open for thirteen to fifteen years. Thirteen percent or six grants with balances have been open less than six nine years. (See Exhibit A)

-Dollars Outstanding. Four percent or three grants with 1992 Proposition A balances have less than \$25,000 outstanding. Forty-four percent of all grants with 1992 Proposition A balances have between \$200,000 and \$499,999 outstanding. One grant has over \$1,200,000 outstanding. (See Exhibit A)

2. Competitive Grants

For the purposes of this report, competitive grants are restricted to only those that were authorized by the 1992 Proposition A in the following seven competitive categories. As of January 31, 2012, eighteen grants had a combined balance of \$1,988,857.

-Years Open. Fifty-five percent or ten of the eighteen competitive grants with 1992 Proposition A balances have been in place for ten to fifteen years. Thirty-three percent or six grants have been open for five years or less. (See Exhibit B)

-Dollars Outstanding. Fifty-six percent or ten of the eighteen grants with dollars outstanding are in amounts less than \$50,000. Twenty-eight percent or five of the grants with dollars outstanding are in amounts between \$200,000 and \$499,999. (See Exhibit B)

- a. Trails Acquisition and Development (Section 8.a.3.A). The grant balances from three grants to two grantees total \$129,932.
- b. Senior Centers and Recreation Facilities (Section 8.a.3.B). The grant balances from two grants total \$120,000.
- c. Urban Tree Planting (Section 8.a.3.C). The grant balances from two grants to one grantee total \$52,037.
- d. Rivers and Streams (Section 8.a.3.D). The grant balances from five grants to three grantees total \$594,395.
- e. Graffiti Prevention (Section 8.a.3.E). The grant balance from two grants to two grantees total \$124,965.
- f. At-Risk Youth Recreation and Service Facilities (Section 8.a.4). The grant balances from five grants to three grantees total \$967,528.

3. Non-Competitive Grants

For the purposes of this report, non-competitive grants include any grants that do not fall into the placeholder or true competitive grant categories. The 1992 Proposition A assigned discretionary, specified, designated competitive and per parcel funds to the agencies listed below. As of January 31, 2012, forty-six grants had a combined balance of \$16,150,111.

-Years Open. Thirty-eight percent or seventeen non-competitive grants with 1992 Proposition A balances have been in place for sixteen to eighteen years. Twenty-nine percent or thirteen grants have been open for thirteen to fifteen years. (See Exhibit C)

-Dollars Outstanding. Twenty-nine percent of the non-competitive grants with dollars outstanding are in amounts less than \$50,000. Twenty-seven percent are in amounts between \$100,000 and \$299,999. Twenty-two percent are between \$300,000 and \$999,999. Eight percent of the dollars outstanding are in amounts greater than \$1,000,000. (See Exhibit C)

- a. Department of Parks and Recreation - Discretionary (Section 8.a.1). The grant balance from one grant totals \$233,398.
- b. Department of Parks and Recreation - Specified (Section 8.a.2). The grant balance from eleven grants total \$2,197,253.*

- c. Department of Beaches and Harbors – Designated Competitive (Section 8.a.5). The grant balance from one grant totals \$354,249.
- d. Santa Monica Bay (DPW) – Designated Competitive (Section 8.a.6). The grant balances from two grant total \$1,540,039.
- e. Cities and Unincorporated County - Per Parcel (Section 8.b.1). The grant balances from twelve grants totals \$2,408,962.*
- f. Cities – Specified (Section 8.b.2). The grant balances from fourteen grants total \$8,253,258.
- g. Santa Monica Mountains Conservancy - Specified (Section 8.c). The grant balances from seven grants total \$524,762.
- h. CA Museum of Science and Industry – Specified (Section 8.d). The grant balance from one grant totals \$638,190.

*Grant 1470-99-0787 is funded with both Specified (Section 8.a.2) and Per Parcel (Section 8.b.1) funds.

4. **Placeholder Grants.** Residual funds allocated to the County Department of Parks and Recreation from completed, cancelled or modified projects are held in placeholder grants. These funds are earmarked for acquisition and/or development of various parks in a particular supervisorial district. As of January 31, 2012, the residual funds of four placeholder grants, spread across four Supervisorial Districts totaled \$1,058,262.

-Years Open. Three placeholder grants with 1992 Proposition A balances have been in place for an average of 5.4 years. The fourth placeholder grant has been open for one year. (See Exhibit D)

-Dollars Outstanding. The amounts of the unspent funds in the placeholder grants range from \$19,364 to \$558,189. (See Exhibit D)

- a. The funds in the First Supervisorial District's placeholder grant have resided in Grant No. P099-05-0877 for 5.6 years and total \$19,364.
- b. The funds in the Second Supervisorial District's placeholder grant have resided in Grant No. P100-05-0878 for one year and total \$75,001.
- c. There are no funds in the Third Supervisorial District's placeholder grant number P101-05-0879.

- d. The funds in the Fourth Supervisorial District's placeholder grant have resided in Grant No. P102-05-0880 for 5.8 years and total \$558,189.
- e. The funds in the Fifth Supervisorial District's placeholder grant have resided in Grant No. P103-05-0881 for 4.8 years and total \$405,708.

Conclusion

The expeditious expenditure of over \$19 million of unspent 1992 Proposition A funds is critical to the management of the Los Angeles County Regional Park and Open Space District. The District will collect the last assessments authorized by the 1992 Proposition A in Fiscal Year 2014-2015. Commencing Fiscal Year 2015-2016, the District's operating budget will decrease by 65% and there will be fewer staff to manage these grants.

I. Introduction

The parks and recreational facilities of Los Angeles County play a vital role in maintaining a high quality of life for County residents. The County owns and operates parks and recreational facilities in both unincorporated areas and cities in the County. These facilities serve the local needs of communities in the unincorporated areas, as well as regional needs countywide.

The Parks and Recreation Element addresses the General Plan's Guiding Principles by providing policy direction for the maintenance and expansion of the County's parks and recreation system. The provision of parks and recreation facilities to address a diversity of populations and needs is an important part of ensuring Sufficient Infrastructure and Community Services, and plays a key role in fostering livability and activities in conjunction with Smart Growth land use and mobility policies. Parks and recreation facilities are an important part of the County's landscape and tourism industry, which can contribute to planning for a Strong and Diverse Economy, and a strong parks and recreation system is one of the most important factors in planning for Healthy, Livable, and Equitable Communities. The Parks and Recreation Element also includes policies that implement effective Environmental Resource Management practices on its vast recreation and open space areas.

The purpose of the Parks and Recreation Element is to plan and provide for an integrated parks and recreation system that meets the needs of residents in the County. The goals and policies set forth in this Element address the growing and diverse recreation needs of the communities served by the County.

II. Background

Park and recreation planning in the County is guided in part by several important plans and studies. Two documents that guide County park planning are the Parks and Recreation Strategic Plan and the Strategic Asset Management Plan (SAMP).

Los Angeles County General Plan
Public Review Draft
Text-Only Version 5/2012

In 1992, the Department of Parks and Recreation (DPR) prepared the Parks and Recreation Strategic Plan for 2010 to guide the decision-making process for the future development of parks and implementation of recreation programs. The Strategic Plan assesses existing park acreage and future recreation needs; identifies goals, objectives, and policies for appropriate future actions; and includes recommendations based on needs, goals and public involvement to guide the future direction of parks and recreation in the County. In 2003, DPR updated the Strategic Plan to create a road map to meet the various community recreation needs as the population continued to grow and change. The document identifies important trends and opportunities, while setting the Department's direction for a five-year period.

In 2004, DPR prepared the SAMP for 2020 to provide County decision-makers, park planners, and the public with updated information and analyses, and to prioritize the allocation of limited economic resources for the provision of parks, recreation facilities, and open space. The SAMP includes park inventories, identifies needs, and provides recommendations for each Planning Area and each Supervisorial District.

Parkland Classifications

For planning purposes, parks are classified based on the size, use, and physical characteristics of the land. In addition, the traditional template of local and regional parks has been expanded to capture diverse opportunities for acquisition and development of parkland. The County's park system, including facilities that are owned, operated, and maintained by the County, totals 27,480 acres. Table 7.1 summarizes the acreage of local and regional parkland, by Planning Area. A complete inventory of the parks operated by DPR can be found in Appendix F.

Table 7.1: Existing County Parkland, by Planning Area

Parkland, in Acres			
Planning Area	Local	Regional	Total

Total	650	26,816	27,466

Source: Los Angeles County Department of Parks and Recreation, April 2012.

The County offers a wide variety of parks and recreation resources, which generally fall under two systems: local park system and regional park system. In addition, the County offers multi-user trails and access to other recreation facilities, such as city parks and facilities and private recreation facilities.

Local Park System

The local park system consists of parks of varying sizes that meet local needs and offer opportunities for daily recreation. This system includes community parks, neighborhood parks, pocket parks, and park nodes, and is summarized in Table 7.2.

Community Parks

Community parks are typically 10 to 20 acres, and serve several neighborhoods within a 1 to 2 mile radius of the park. Community parks that are located in residential neighborhoods serve both the needs of the community park service radius and neighborhood park service radius. Community parks provide opportunities for a wide variety of active and passive recreation activities. The amenities programmed into a community park are focused on meeting the needs of several neighborhoods or large sections of the community. They allow for group activities and recreational opportunities that may not be feasible in neighborhood parks. Amenities for community parks can include informal open play areas, children's play apparatus, group picnic areas with overhead shelters, barbecues, lighted sports fields, basketball courts and tennis courts, public restrooms, concession building, maintenance building, onsite parking and information kiosks.

Neighborhood Parks

Neighborhood parks are typically 3 to 10 acres, and serve residents living within a half mile radius of the park. Neighborhood parks provide space, programs and recreation activities to create healthy social networks within residential communities. The common objective of all neighborhood parks is to bring people together to recreate and socialize close to home. Ease of access and walking distance uninterrupted by major roads and other physical barriers are important factors in locating neighborhood parks. Neighborhood parks should be well-connected to other public facilities, such as schools and libraries. Amenities for neighborhood parks can include informal open play areas, children's play apparatus, picnic tables, picnic shelters, barbecues, practice sports fields, basketball, tennis and volleyball courts, public restrooms, information kiosks, recreation offices, and onsite parking.

Pocket Parks

Pocket parks are less than three acres in size, and serve residential or business areas within a quarter mile radius or within walking distance. They are best used to meet limited or specialized recreational needs. Pocket parks can provide landscaped public use areas in industrial and commercial areas, scenic overlooks, linkage to a community pathway system, and urban infill sites in

Los Angeles County General Plan
Public Review Draft
Text-Only Version 5/2012

parks poor communities. Pocket parks generally do not have onsite parking. Amenities for pocket parks can include both active and passive features, depending on the community's setting and needs, such as children's play apparatus, picnic areas, fountains and seating areas. Due to the limited amenities included in pocket parks, they are typically not included in the service radius analysis.

Park Nodes

Park nodes are small pieces of open space that serve as public destinations, connections, and community defining spaces. Nodes provide physical and visual breaks to the urban landscape and connect various spaces, such as waterways, streets, trails, and greenways. Park nodes are used as gathering and rest areas, and serve as opportunities for social and cultural exchange. Examples of park nodes include equestrian and hiking trail heads, bike rest stops and stations with lockers and repair areas, neighborhood focal points, and passive amenities, such as plazas, rest areas, playgrounds, landmarks, and public art installations.

Table 7.2: Local Park System Summary

Facility	Typical Park Features and Amenities
Community Park Acres Per Thousand Population: 4/1,000 Suggested Acreage: 10 to 20 acres Service Area: 1 to 2 miles	Passive park amenities including but not limited to: informal open play areas, children's play apparatus, family and group picnic areas with overhead shelters, barbecues. Active sports activities including but not limited to: lighted sports fields, basketball courts and tennis courts. Additional amenities may include aquatics complex, skate park, arena soccer, roller hockey, community gardens, and dog parks. Park facilities including but not limited to: public restrooms, concession building, community buildings, maintenance building and onsite parking and information kiosks.
Neighborhood Park Acres Per Thousand Population: 4/1,000 Suggested Acreage: 3 to 10 acres Service Area: 1/2 mile	Passive park amenities including but not limited to: informal open play areas, children's play apparatus, group picnic areas with overhead shelters, barbecues. Active park amenities including but not limited to: practice sports fields, basketball, tennis, and volleyball courts. Park facilities including but not limited to: public restroom, onsite parking and information kiosks.
Pocket Park Acres Per Thousand Population: 4/1,000 Suggested Acreage: less than 3 acres Service Area: 1/4 mile	Passive park amenities including but not limited to: picnic areas and seating areas. Active park amenities including but not limited to: children's play apparatus.

--	---

Regional Park System

The regional park system is intended to meet the park and recreation needs of residents and visitors throughout the County. This system consists of community regional parks, regional parks, and special use facilities, and is summarized in Table 7.3.

Community Regional Parks

Community regional parks are typically 20 to 100 acres, and have a service radius of 20 miles. Community regional parks protect and conserve natural resources, preserve open spaces, and provide recreational facilities that are not available in neighborhood or community parks. Amenities for community regional parks can include a jogging exercise course, informal open play areas, children's play apparatus, group picnic areas with overhead shelters, barbecues, lighted sports fields, basketball courts and tennis courts, information kiosks, public restrooms, concession building, recreation offices, maintenance buildings, and onsite parking. Community regional parks may also have one or more of the following features: multiple sports facilities, aquatics center, fishing lake, community building and gymnasium, and scenic views and vistas.

Regional Parks

Regional parks are typically greater than 100 acres in size, and have a service radius of 25 miles or more. They include unique areas such as lakes, wetlands, auditoriums, water bodies, and campgrounds, in addition to the active recreational facilities offered in community and community regional parks. Many of the recreation activities are associated with experiencing the natural environment. A regional park may also perform important ecological and environmental functions, including serving as wildlife habitats. The connection of these parks to natural areas is often vital to ensuring a healthy ecological system. Amenities for regional parks can include picnic areas, nature centers, trail systems, scenic drives, campgrounds, water areas for swimming, fishing and boating, and in some cases, sport fields.

Special Use Facilities

Special use facilities are generally single purpose facilities that serve the greater regional recreational or cultural needs of the County. One notable example is the Hollywood Bowl. Special use facilities require adequate public access and sufficient buffers to protect adjacent residential users and to insulate the park from commercial or industrial development. Special use facilities can provide both passive (e.g. historic and cultural facilities, natural areas, habitat preservation areas, arboreta and botanical gardens, and nature centers) and active (e.g. golf courses and driving ranges, equestrian centers, off highway vehicle (OHV) parks, water parks or aquatic facilities, and skate parks) needs within the region. There are no size criteria or service radius areas associated with special use facilities.

Table 7.3: Regional Park System Summary

Facility	Typical Park Features and Amenities
<p>Community Regional Park</p> <p>Acres Per Thousand Population: 6 /1,000 Suggested Acreage: 20 to 100 acres Service Area: up to 20 miles</p>	<p>Passive park amenities including but not limited to: informal open play areas, children's play apparatus, group picnic areas with overhead shelters, barbecues.</p> <p>Active sports activities including but not limited to: lighted sports fields, basketball courts and tennis courts.</p> <p>Additional amenities may include one or more of the following features: multiple sports facilities, aquatics center, fishing lake, community building and gymnasium, and scenic views and vistas.</p> <p>Park facilities including but not limited to: public restrooms, concession building, community buildings, maintenance building and onsite parking and information kiosks.</p>
<p>Regional Park</p> <p>Acres Per Thousand Population: 6 /1,000 Suggested Acreage: greater than 100 acres Service Area: 25+ acres</p>	<p>Passive park amenities including but not limited to: group picnic areas with overhead shelters, barbecues.</p> <p>Additional amenities may include one or more of the following features: lakes, wetlands, auditoriums, water bodies for swimming, fishing and boating, and sports fields.</p>
<p>Special Use Facility</p> <p>Acres Per Thousand Population: 6 /1,000 No size criteria No assigned service radius area</p>	<p>Generally, single purpose facilities. Can include passive features such as: wilderness parks, nature preserves, botanical gardens and nature centers.</p> <p>Active uses can include: performing arts, water parks, aquatic facilities, skate parks, golf driving ranges and golf courses.</p>

Trails

The County offers unique trail user opportunities that showcase the diverse scenery and provide connectivity to parks, open spaces, cultural resources, and wilderness areas. The County has an ideal climate for trail user activities on most days of the year.

Typical trail uses range from hiking and walking, to mountain biking and horseback riding, with many users participating in more than one activity. The quality of the trail experience is directly proportional to the state of the visual, natural, and educational environment through which the trail passes. The wide variety of experiences, include but are not limited to: exercise, solitude, spiritual practices, physical and mental well-being, building social networks, testing athletic skills, and experiencing

nature. The County strives to make all trails multi-use and accessible to all non-motorized users including pedestrians, equestrians, and mountain bicyclists, where appropriate.

In May 2011, the Los Angeles County Board of Supervisors adopted the County of Los Angeles Trails Manual (Trails Manual), which provides County staff and developers with guidelines and standards for trail planning, design, development, and maintenance of County trails. The purpose of the Trails Manual is to provide guidance to County departments that interface with trail planning, design, development and maintenance of hiking, equestrian, and mountain biking recreational trails, while addressing physical and social constraints and opportunities associated with the diverse topographic and social conditions that occur in the unincorporated territory of the County.

Figure 7.1 depicts the County's regional trail system.

Figure 7.1: Regional Trail System

Other Recreation Facilities

In addition to local and regional parks and trails, County residents are served by the following types of recreation facilities: multi-benefit parks, school sites, city parks and facilities, private recreational facilities, and greenways.

Multi-Benefit Parks

Multi-benefit parks and open spaces are created through collaborative efforts among city, county, state, and federal agencies; private organizations; schools; private landowners; and industries. These parks are characterized as having more than one function and contributing to multiple program goals. There are a number of applications of multi-benefit parks including: utility corridors and flood control basins that can serve as areas for active or passive recreation; school sites located adjacent to parks that can share facilities, such as parking and park amenities; watershed areas that can protect critical wildlife habitats, preserve open space, provide trails for recreation, and contribute to water conservation objectives; and water districts, where trails can be located adjacent to flood control channels and trailhead parks.

School Sites

The County works with school districts to organize, promote, and conduct joint recreational and educational programs. These community recreation agreements are a form of joint-use agreement, where either a school or park facility may be put to some recreational use by the other party in exchange for some facility improvement and/or maintenance. A park does not have to be adjacent to a school (i.e., share a common boundary) for an agreement to be viable.

City Parks and Facilities

City parks and facilities that are located close to the borders of the unincorporated areas are enjoyed by city and County residents alike. Similarly, local County parks that are located within or close to the borders of cities provide recreational amenities for both populations. This overlap in local park service radius is an important factor to consider in the placement of new local County parks.

Private Recreational Facilities

Private recreational facilities play an important role in meeting the recreational needs of the County. The network of private recreational facilities within the County consists of churches, health and

Los Angeles County General Plan
Public Review Draft
Text-Only Version 5/2012

fitness clubs, and other organizations that offer a variety of programs and facilities. This Element does not include an inventory of private recreational facilities, and as the County does not control, maintain, or program private recreational facilities, these resources are not credited toward the County's acreage goals for public parks.

Greenways

Greenways provide a linear area along natural corridors, and often follow features such as rivers, man-made waterways, drainage channels, and utility easements. Greenways can accommodate various modes of uninterrupted pedestrian travel on pathways, including walking, jogging, and bicycling, and can include recreation areas and natural landscape features.

Recreation Programs

Along with access to parks and recreation facilities, the availability of a wide range of recreation programs is critical to the quality of life in any community. A comprehensive offering of effective recreation programs benefit individuals, neighborhoods, and households of all ages, income levels, cultures and abilities by:

- Offering opportunities to play, grow, and learn;
- Providing a sense of place and of belonging;
- Promoting health and wellness, including obesity prevention;
- Improving neighborhood and community connections, and problem-solving;
- Enhancing community cohesiveness while honoring diversity; and
- Helping protect natural environments.

Recreation programs can range from organized sports, tournaments, scheduled classes, and special events, to more individualized, casual leisure activities such as family picnics and walking. Effective recreation programs promote the constructive use of leisure time and a lifelong commitment to a healthy lifestyle.

DPR offers a wide variety of recreation programs to meet the diverse needs of County residents. These programs serve a diverse group of stakeholders including, but not limited to: preschool-aged children, elementary school-aged youth, middle school-aged youth, high school-aged youth, adults, seniors and households.

Parkland Dedication and Funding

The County standard for the provision of parkland is 4 acres of local parkland per 1,000 residents of the population in the County's unincorporated areas, and 6 acres of regional parkland per 1,000 residents of the County's total population. This section describes the County's parkland dedication requirements, as well as funding mechanisms for the planning and development of parks and recreation facilities in the County.

Los Angeles County General Plan
Public Review Draft
Text-Only Version 5/2012

Quimby Act

The California Quimby Act, which is part of the Subdivision Map Act, applies to residential subdivisions and permits the County, by ordinance, to require the dedication of land or payment of fees for park and recreational purposes. As part of its approval of a subdivision, the County may require the subdivider to provide land to serve the park and recreational needs of future residents of the subdivision.

The Quimby Act establishes a standard of dedicating 3 acres of parkland per 1,000 residents for subdivisions. However, as a condition of zone change approval, General Plan amendment, specific plan approval, or development agreement, the County may require a subdivider to dedicate land according to the following General Plan standards of 4 acres of local parkland per 1,000 residents in the unincorporated areas, and 6 acres of regional parkland per 1,000 residents. This requirement is justified as long as an appropriate nexus between the project and the dedication can be shown.

Quimby fees may be used to acquire land for local park purposes, improve local parkland (including existing local parks), or both acquire and develop local parkland. To convert a Quimby obligation in land (acres) into the Quimby fee, the land obligation is multiplied by the Representative Land Value (RLV) per acre for the Park Planning Area (PPA) in which the subdivision is located. RLVs are adjusted annually based upon changes in the Consumer Price Index.

Because of the need for usable public parkland for active recreation purposes, DPR rarely gives any Quimby credit for parkland exceeding a slope of three percent and instead gives credit for the "net" park acreage (maximum slope of three percent) the County receives. In addition, DPR does not accept undeveloped park sites from developers. This means that the developer is required to provide a developed park to the County on a "turn-key" basis and receives credit for the costs of developing the public park up to and against any remaining Quimby obligation, after accounting for the net acreage dedicated to the County.

For the purposes of the County's Quimby Act Ordinance, the unincorporated areas are divided into 47 PPAs, based on location and neighborhood characteristics. The Quimby fees generated in one PPA may not be spent in another area.

Proposition A Funds

Proposition A Funds may be used to fund the development, acquisition, improvement, restoration and maintenance of parks; recreational, cultural and community facilities; and open space lands within the County. These funds are administered by the Los Angeles County Regional Park and Open Space District. The Open Space District was created when voters approved Proposition A in 1992. Proposition A authorized an annual assessment on nearly all of the 2.25 million parcels of real property in the County. Proposition A funded \$540 million for the acquisition, restoration or rehabilitation of real property for parks and park safety, senior recreation facilities, gang prevention, beaches, recreation, community or cultural facilities, trails, wildlife habitats, or natural lands, and maintenance and servicing of those projects. In 1996, the County's voters approved another Proposition A to fund an additional \$319 million for parks and recreation projects and additional funds for maintenance and to service those projects.

Landscaping and Lighting District

The California Landscaping and Lighting Act of 1972 authorizes local legislative bodies to establish benefit related assessment districts, or Landscaping and Lighting Districts (LLADs) and to levy

Los Angeles County General Plan
Public Review Draft
Text-Only Version 5/2012

assessments for the construction, installation, and maintenance of certain public landscaping and lighting improvements. LLADs may be established to maintain local public parks.

Mello-Roos District

A developer may apply to the County to form a Mello-Roos District pursuant to the California Mello-Roos Community Facilities Act of 1982 to develop and maintain park improvements. Pursuant to County guidelines, the parks should be regional in nature, and have an impact or benefit beyond the associated subdivision.

III. Issues

1. Park Planning For a Diversity of Needs

Parks and recreational facilities are used for various purposes by a wide range of users. Because the needs of park users are diverse, no individual park or recreational facility can meet the needs of all users. Therefore, a diverse and comprehensive system of facilities is needed to provide a wide range of recreational opportunities.

A mistaken assumption is that park and recreation planning only involves looking at population projections and then providing more of what already exists. Numerous studies have shown that parks and recreation needs and preferences vary by age, race and ethnicity, and other factors. In addition, the physical distribution of parkland and park accessibility by underrepresented groups and underserved populations, including low-income and transit-dependent communities, are important considerations. The County must understand and plan for these diverse park and recreation needs.

Based on data from a wide variety of sources, outdoor recreation activities with learning components, trail related experiences, and water recreation will increase. Motorized recreation, augmented with navigational equipment, will also continue to grow. As the population evolves and changes, there will be many new supporters and advocates for outdoor recreation and opportunities for partners to contribute to a better quality of life. Cooperation and partnerships between public, private, and nongovernmental service providers can ensure a seamless and comprehensive system of outdoor recreation opportunities and experiences.

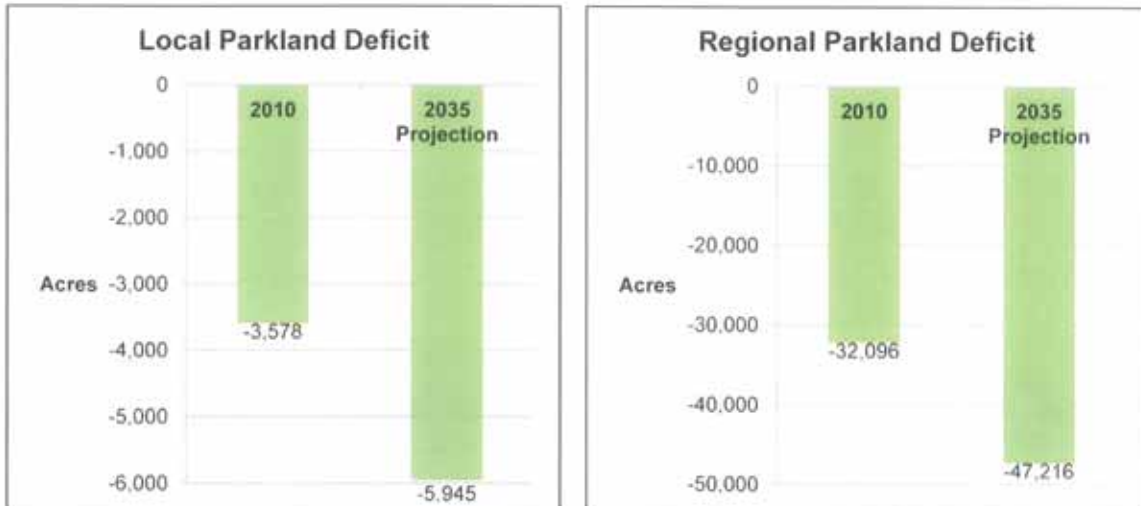

Enhanced collaboration refers to the idea of providing more and improved park and recreation services through multiple use facilities and partnerships with other public, non-profit, and private organizations. The County must work with other agencies to leverage financial, land, and other resources to meet the growing and diverse recreation needs of County residents.

2. Acquisition and Development of Additional Parkland

There are large areas of the County that are underserved by parks and recreational facilities. Nearly two out of three children in the County do not live within walking distance (one quarter mile) of a park, playground, or open space. DPR conducted a preliminary gap analysis to determine the County's need for additional parks and to identify park poor areas. The Gap Analysis Study shows that the County faces significant deficits in local and regional parkland: 3,578 acres for local parkland and 32,096 acres for regional parkland, as shown in Table 7.4 and Figures 7.2 and 7.3. Based on population projections, these deficits will increase to 5,945 acres in local parkland and 47,216 acres in regional parkland by the year 2035 if no new parks are created.

Figure 7.2: Local Parkland Gap Analysis

Figure 7.3: Regional Parkland Gap Analysis

The gap analysis represents a first step toward identifying park-deficient neighborhoods in the unincorporated areas. Figures 7.4 and 7.5 show the service radius for local and regional parks. Areas that do not lie within the service radius are considered underserved by parks and recreation facilities.

A good community parks and recreation system is based on the quality of facilities and services provided, as well as the ability to anticipate and respond to changing trends. According to the report, *Park and Recreation Trends in California 2005*, changes in the size and composition of State's population will drive the impacts on the delivery of parks and recreation services in the future.

A more in-depth gap analysis will be conducted as part of the County's future Parks and Recreation Master Plan. This analysis will involve a detailed review of demographic, geographic, land use, and transportation data for each Planning Area to determine its park deficiencies in terms of acreage,

accessibility, and suitability. For more information on the Parks and Recreation Master Plan, please refer to Part III: General Plan Implementation Programs.

3. Improved Trail Systems

Trails offer opportunities for people to hike, walk, run or ride, and encourage people to connect with nature. As linear parks, trails help make the region more livable and provide communities with access to increased health and fitness activities. Trails can also promote increased activity with smaller amounts of land than large parks, and can often use leftover or unwanted land.

As the County's population continues to grow and the region becomes increasingly urbanized, the demand for outdoor recreation opportunities and trails will increase. One way to meet this demand is to create and maintain an adequate multi-use trail system that is accessible to all County residents and to provide continuous enjoyment through increased and expanded connectivity. Additional trails are also needed closer to population centers in the central and southwestern portions of the County, where more residents could conveniently access and reap the recreation, health, and mobility benefits of trails.

Multi-use trails are used by equestrians, cyclists, hikers, and runners. As the amount of public land continues to decrease, the need for multi-use trails will continue to grow, as well as the need to find solutions to possible user conflicts. An expanded multi-use trail system can alleviate user conflicts, while also providing increased access to this important health and fitness system.

4. Protection of Historical and Natural Resources on County Park Properties

Many County parks contain important historical and natural resources that must be protected. Historic resources on County park properties include buildings, collections, landscapes, bridges, and other physical features. The maintenance, repair, rehabilitation, restoration, or reconstruction of historical resources are carried out in a manner that is consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic Buildings.

Natural resources include natural areas, sanctuaries, and open space preserves. There is a need to establish linkages that will promote connectivity to enhance the movement of wildlife and promote genetic health among native species of plants and animals. Continuous efforts to expand the regional park system are necessary to protect and conserve natural resources regardless of the required park acreage based upon park standards. Open space areas that are established for conservation purposes, such as wildlife sanctuaries, provide a greater benefit than the relative location of the site to populated areas. In the regional park system, a key consideration is the ecological health of natural environments. Accessibility to regional facilities is also important. Access may be enhanced by providing improved public transportation to connect population centers with regional parks.

Threats to these resources include both intentional and unintentional acts, such as deferred maintenance, renovation or improvements that significantly alter or damage the resource, acts of vandalism and theft, or overuse by park users.

5. Sustainable Parks

County park properties must contribute to the County's goals of sustainability, carbon footprint reduction, water conservation, and energy conservation. Sustainable design and management are

Los Angeles County General Plan
Public Review Draft
Text-Only Version 5/2012

necessary to promote responsible environmental practices, enhance social benefits, and reduce the cost of ownership and management.

All park projects must be considered within their surrounding context. Landscapes need to be treated as interdependent and interconnected spaces that share systems of soil, topography, vegetation, and water. By understanding these larger patterns and employing a comprehensive approach, parks can be designed in a way that helps repair and restore ecosystems rather than detract from them. For example, designing a park to take advantage of natural processes is one way to achieve sustainability through site design.

Funding is the main challenge facing the design and implementation of sustainable strategies. However, sustainable design and management practices will help reduce operation and maintenance costs in the long run. In addition, regular maintenance and preventative measures can prolong the life of existing buildings and facilities on County park properties, and reduce the need for new or expanded facilities.

IV. Goals and Policies

Goal P/R 1: Enhanced active and passive park and recreation opportunities for all users.	
Topic	Policy
Park Programming	Policy P/R 1.1: Provide opportunities for public participation in designing and planning parks and recreation programs.
	Policy P/R 1.2: Provide additional active and passive recreation opportunities based on a community's setting, and recreational needs and preferences.
	Policy P/R 1.3: Consider emerging trends in parks and recreation when planning for new parks and recreation programs.
	Policy P/R 1.4: Promote efficiency by building on existing recreation programs.
Park Management	Policy P/R 1.5: Ensure that County parks and recreational facilities are clean, safe, inviting, usable and accessible.
	Policy P/R 1.6: Improve existing parks with needed amenities and address deficiencies identified through the park facility inventories.
	Policy P/R 1.7: Ensure adequate staffing, funding, and other resources to maintain satisfactory service levels at all County parks and recreational facilities.
	Policy P/R 1.8: Enhance existing parks to offer balanced passive and active recreation opportunities through more efficient use of space and the addition of new amenities.
	Policy P/R 1.9: Offer more lighted playing fields using energy efficient light fixtures where appropriate to extend playing time.
	Policy P/R 1.10: Ensure a balance of passive and recreational activities in the development of new park facilities.

Los Angeles County General Plan
Public Review Draft
Text-Only Version 5/2012

	Policy P/R 1.11: Provide access to parks by creating pedestrian and bicycle-friendly paths and signage regarding park locations and distances.
--	--

Goal P/R 2: Enhanced multi-agency collaboration to leverage resources.

Topic	Policy
Collaboration and Financing	Policy P/R 2.1: Develop joint-use agreements with other public agencies to expand recreation services.
	Policy P/R 2.2: Establish new revenue generating mechanisms to leverage County resources to enhance existing recreational facilities and programs.
	Policy P/R 2.3: Build multi-agency collaborations with schools, libraries, non-profit, private, and other public organizations to leverage capital and operational resources.
	Policy P/R 2.4: Utilize school and library facilities for County sponsored and community sponsored recreational programs and activities.
	Policy P/R 2.5: Support the development of multi-benefit parks and open spaces through collaborative efforts among entities such as cities, County, state, and federal agencies, private groups, schools, private landowners, and other organizations.
	Policy P/R 2.6: Participate in joint powers authorities (JPAs) to develop multi-benefit parks as well as regional recreational facilities.
	Policy P/R 2.7: Increase communication and partnerships with local law enforcement, neighborhood watch groups, and public agencies to improve safety in parks.
Mass Care Shelters	Policy P/R 2.8: Evaluate and enhance facilities and amenities with respect to alternative use of parks to carry out Mass Care and Shelter operations in the wake of a disaster.

Goal P/R 3: Acquisition and development of additional parkland.

Topic	Policy
Parkland Acquisition and Dedication	Policy P/R 3.1: Acquire and develop additional local and regional parkland to meet the following County standards: 4 acres of local parkland per 1,000 residents in the unincorporated areas and 6 acres of regional parkland per 1,000 residents of the County's total population.
	Policy P/R 3.2: For projects that require zone change approvals, general plan amendments, specific plans, or development agreements, require developers to provide for local and regional parkland above and beyond their Quimby obligations as based on an appropriate nexus study.

Los Angeles County General Plan
Public Review Draft
Text-Only Version 5/2012

	Policy P/R 3.3: Require as a condition of residential subdivision approval that a subdivider create a LLAD to maintain the park.
	Policy P/R 3.4: Provide additional parks in communities with insufficient local parkland as identified through the gap analysis.
	Policy P/R 3.5: Expand the supply of regional parks by acquiring land that would: 1) provide a buffer from potential threats that would diminish the quality of the recreational experience; 2) protect watersheds; and 3) offer linkages that enhance wildlife movements and biodiversity.
	Policy P/R 3.6: Collaborate with other public, non-profit, and private organizations to acquire land for parks.
	Policy P/R 3.7: Pursue a variety of opportunities to secure property for parks and recreational facilities, including purchase, grant funding, private donation, easements, surplus public lands for park use, and dedication of private land as part of the development review process.
Parkland Development	Policy P/R 3.8: Mitigate impacts from freeways to new parks to the extent feasible.
	Policy P/R 3.9: Site new parks near schools, libraries, senior centers and other community facilities where possible.

Goal P/R 4: Improved accessibility and connectivity to a comprehensive trail system including rivers, greenways, and community linkages.

Topic	Policy
Trail System	Policy P/R 4.1: Create multi-use trails to accommodate all users.
	Policy P/R 4.2: Develop staging areas and trail heads at strategic locations to accommodate multi-use trail users.
	Policy P/R 4.3: Develop a network of feeder trails into backbone trails.
	Policy P/R 4.4: Maintain and design multi-purpose trails in ways that minimize circulation conflicts among trail users.
	Policy P/R 4.5: Collaborate with other public, non-profit, and private organizations in the development of a comprehensive trail system.
	Policy P/R 4.6: Create new multi-use trails that link community destinations including parks, schools and libraries.

Goal P/R 5: Protection of historical and natural resources on County park properties.

Los Angeles County General Plan
Public Review Draft
Text-Only Version 5/2012

Topic	Policy
Park Resource Preservation	Policy P/R 5.1: Preserve historic resources on County park properties, including buildings, collections, landscapes, bridges, and other physical features.
	Policy P/R 5.2: Expand the collection of historical resources under the jurisdiction of the County, where appropriate.
	Policy P/R 5.3: Protect and conserve natural resources on County park properties, including natural areas, sanctuaries, and open space preserves.
	Policy P/R 5.4: Ensure maintenance, repair, rehabilitation, restoration, or reconstruction of historical resources in County parks and recreational facilities are carried out in a manner consistent with the most current Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing Historic Buildings.
Education and Programming	Policy P/R 5.5: Preserve and develop facilities that serve as educational resources that improve community understanding of and appreciation for natural areas, including watersheds.
	Policy P/R 5.6: Promote the use of County parks and recreational facilities for educational purposes, including a variety of classes and after school programs.
	Policy P/R 5.7: Integrate a range of cultural arts programs into existing activities, and partner with multicultural vendors and organizations.

Goal P/R 6: A sustainable parks and recreation system.	
Topic	Policy
Sustainable Parks System	Policy P/R 6.1: Support the use of recycled water for landscape irrigation in County parks.
	Policy P/R 6.2: Support the use of alternative sources of energy, such as wind and solar sources to reduce the use of energy at existing parks.
	Policy P/R 6.3: Prolong the life of existing buildings and facilities on County park properties through preventative maintenance programs and procedures.
	Policy P/R 6.4: Ensure that new buildings on County park properties are environmentally sustainable by reducing carbon footprints, and conserving water and energy.
	Policy P/R 6.5: Ensure the routine maintenance and operations of County parks and recreational facilities to optimize water and energy conservation.

County Parks and Recreation Master Plan

Trails Program

Parks Sustainability Program

[Text Box]

Parks, Playgrounds, and Beaches in the Los Angeles Region (1930)

The Olmsted Brothers and Bartholomew report entitled *Parks, Playgrounds, and Beaches in the Los Angeles Region* was the first comprehensive parks and open space plan for the greater Los Angeles area. The report proposed a system of parks, parkways, children's playgrounds, and public beaches. It was a model of ambitious, intelligent, and sensitive planning commissioned at a time when land was available. However, only segments of the report have been implemented to date. Through its planning efforts and collaboration with other agencies and jurisdictions, the DPR hopes to revive and fulfill the Olmsted and Bartholomew vision to the maximum extent possible.

[Text Box]

Green Visions Plan (2007)

Green Visions is a joint venture between the University of Southern California and the region's land conservancies, including the Rivers and Mountains Conservancy, Santa Monica Mountains Conservancy, Coastal Conservancy, and the Baldwin Hills Conservancy. The Green Visions Plan offers a guide to habitat conservation, watershed health and recreational open space for the Los Angeles metropolitan region. The electronic tools and data developed as part of Green Visions are intended to expand the analytic and planning capabilities of local agencies and organizations to, among other things, reduce the fragmented, piecemeal approach to regional resource planning.

[Text Box]

Greater Los Angeles County Integrated Regional Water Management Plan (2006)

The 2006 Greater Los Angeles County Integrated Regional Water Management Plan (IRWMP) addresses water resource issues of the Los Angeles region in an integrated and collaborative manner. Recreation and open space are important components of the IRWMP, with 6 of the 13 priority projects providing open space, habitat, and recreational benefits. The IRWMP also recommends that 30,000 acres of new parkland be acquired to keep pace with population growth.

SCAG Regional Comprehensive Plan (2008)

In 2008, the Southern California Association of Governments (SCAG) completed the Regional Comprehensive Plan (RCP) as a vision of how Southern California can balance resource conservation, economic vitality, and quality of life. The RCP presents a visionary, regionwide approach to coordinate and facilitate the preservation of open space in Southern California. Specifically, the Plan includes an "Open Space and Habitat" chapter, which focuses on community open space, natural lands, and farmlands. Community open space includes areas that enhance the quality of life and completes interconnected networks of parks, trails, greenbelts, community gardens, and urban forests serving the region's communities.
